

The Toolbox in Photoshop

The Toolbox is shown down the left side of the screen.

- Some icons hide other functions
 - Eg there are 4 Marquee tools 'under' the second icon down.
- To access a hidden tool, hold down the mouse button over the icon, then drag to the icon you want.
- The toolbox icon stays as the last thing you used.
- The overview below shows all the tools expanded out, along with the letters that comprise their shortcuts.

Some workspaces don't contain all the tools. If you find that you're missing a tool, click Edit, Toolbar, then Restore Defaults.

Frame tool – doesn't share, so not shown in the expansion.

Note – the Gradient Tool and the Paint Bucket share an icon. It's easy to forget this and lose one of them!

Colour Picker

Full screen F. Don't press F accidentally! If you do, press it again until the screen is back to normal.

Quick Mask Q. Don't press Q accidentally! If you do, press it again to leave Quick Mask.
